Re: Test Results

Enclosed please find the test results for the soil and percolation testing conducted on 10/28/2025 and 11/07/2025. These results will be required by the designer of your proposed sand mound.

These test results are good for 6 years. Once you have a sewage system designed please forward the design to me for my review. Once I have completed my review and approve the system a permit can then be issued.

Please feel free to give me a call if you have any questions at (724) 439-3440.

Thank You,

Sam McVicker
